January 2009

Ron Saunders,

I am writing to thank Fresh-Aire UV for helping our classroom students and teachers have a healthy school year. We had our Fresh-Aire UV units installed the summer leading to our 2009 school year. We are so pleased with the results we have experienced.

Our Pre-K classroom typically has the most absences. These students usually suffer more illness as their little immune systems are getting used to the new environment. We are a school for children with Autism and are very active in helping our students and our community that have been affected by autism.

Our teachers have expressed thanks for also having a healthier school year. It has made a significant difference for our school. We have had great attendance for both our staff and our students. We want our students to be able to be here learning all that they can and getting the most of their school day.

From all of the staff, parents, and children at The Hope Center, thank you.

Sincerely,

Stacie Routt
Director
