Tankless Water Heater

Navien announces the NPE-S series tankless gas water heaters, a standard version of the company's NPE-A series, used in commercial and residential applications. The NPE-S series are identical to the NPE-A series, but exclude the internal buffer tank and recirculation pump and feature an energy factor of 0.98.

UV Light Filter System

The APCO Rack System from *Fresh-Aire UV/Triatomic Environmental* combines UVC light with APCO activated carbon PCO cells. This system is lab tested and proven effective at reducing VOC contaminants in addition to the biologicals that UVGI typically targets.
