

FRESH-AIRE UV[®]

COMMERCIAL SERIES

AIRBORNE DUCT SYSTEM

Airborne Duct System

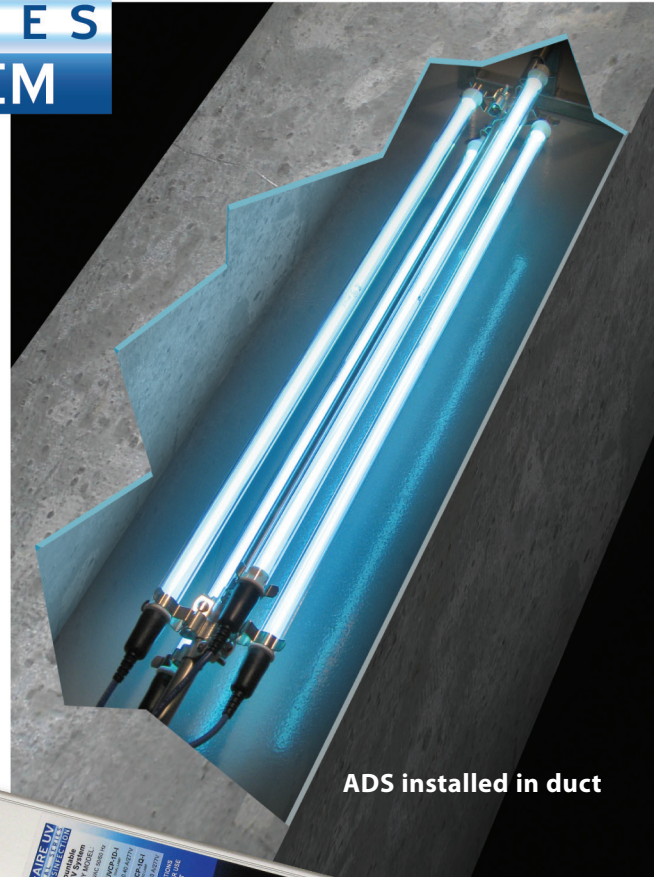

The Fresh-Aire UV[®] Commercial Series Airborne Duct System (ADS) is installed parallel to the airstream inside an HVAC duct to maximize exposure time with the air. The system features our high output Fresh-Aire UV[®] germicidal UV lamps which effectively reduce odors and kill airborne biological contaminants as they pass by. The ADS system is designed with installation flexibility in mind. More lamps can be added as needed depending on duct size and length.

FEATURES

- Ideal for airborne treatment of contaminants
- Highest quality high-output UV-C lamps
- Multi voltage power supply
- Lifetime power supply warranty
- Includes all necessary mounting hardware
- Simple installation
- Easy to add more lamps

BENEFITS

- Reduces odors & kills airborne microbial contaminants
- Improves indoor air quality
- Effective chemical-free air disinfection
- Cost effective

ADS installed in duct

Lifetime water-resistant power supply

High Output
1 Year Lamp
