

## UV Light Accessories

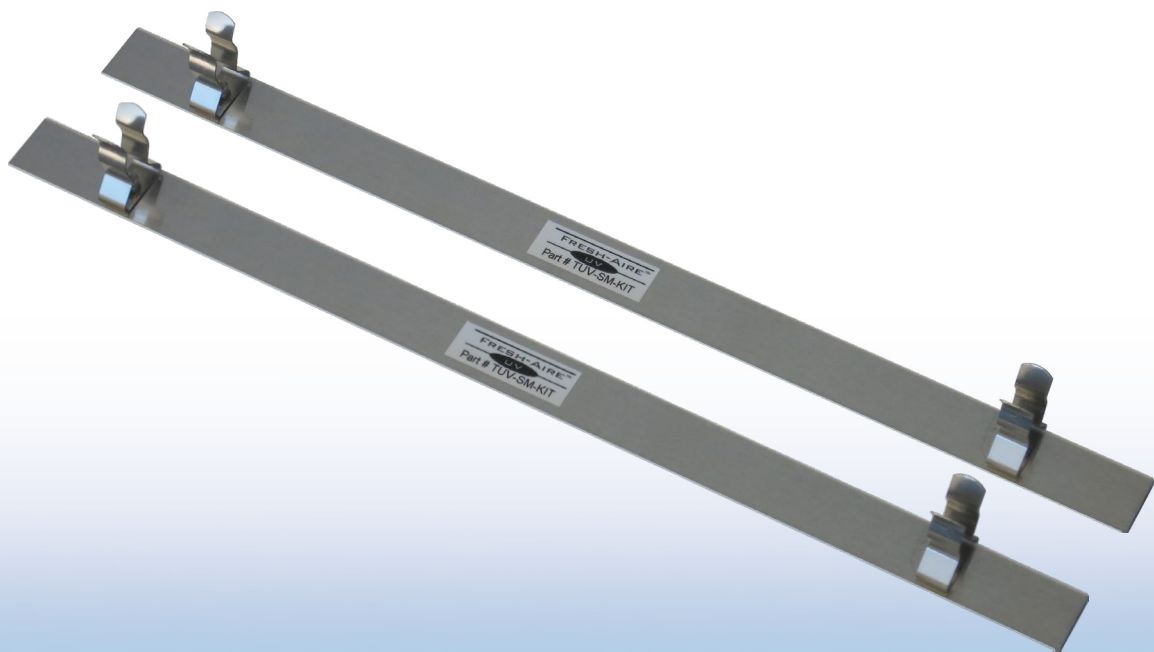

# Surface Mount Kit for AHU Series 1

### For Installation Without Magnets or Screws

The Surface Mount Kit (part# TUV-SM-KIT) is ideal for applications, such as blow through coils in air handlers, where mounting using screws or magnets is not practical. The kit includes two (2) 18" x 2 ½" mounting brackets, super strength molding tape, and hardware to install two (2) Fresh-Aire UV AHU Series 1 germicidal UV lamps (not included).

### Installation

1. Mark position of mounting brackets to maximize UV disinfection of the coil.
2. Use alcohol wipes included to clean the area before applying Super Strength Molding Tape.
3. Remove backing from tape and mount bracket. Repeat for other bracket.
4. Press UV lamp ends securely into clips.
