

UV Light Disinfection for Healthcare Applications

Fresh-Aire UV is recognized the world over as a leader in the areas of UV light disinfection for HVAC and ice machine applications.

HVAC

- Highly effective at reducing HAIs
- 99.9% disinfection of Cooling Coils and Drain Pans, Airborne Virus and Bacteria disinfection
- Dramatic maintenance savings by reducing need for coil and drain pan cleaning
- Guaranteed Energy Savings by keeping coil clean
- Improves Indoor Air Quality
- Proven Return on Investment of 1 year or less
- Healthier patients and employees
- Reduce odor-causing VOCs

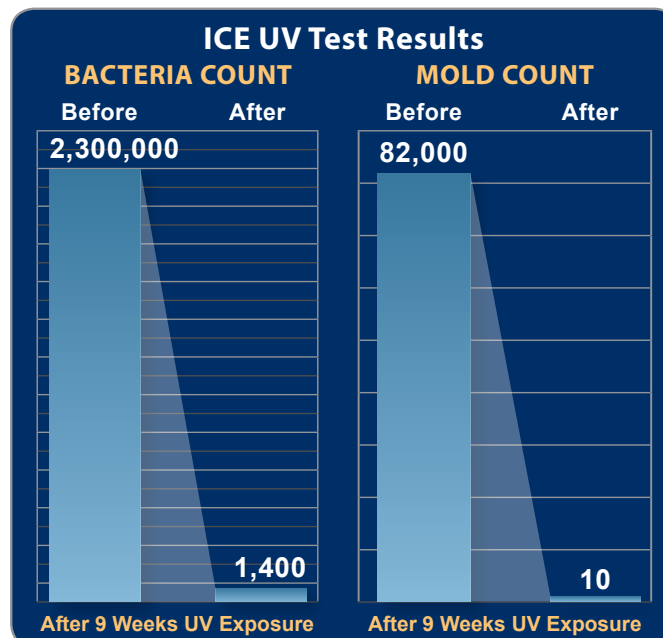

ICE UV

The Original Germicidal UV Light for Ice Machines

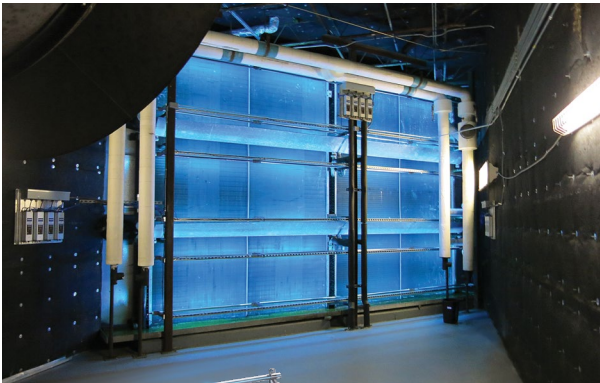

- Saves money on ice machine maintenance
- Reduces microbial contamination 99.9%
- Reduces health risks from dirty ice
- Kills Mold, E. Coli, Legionella, etc.
- Cost of ICE UV = 1 Cleaning
- Guaranteed ROI less than 1 year

UV Replacement Lamps

For all manufacturers lengths from 6" to 60"

Commercial HVAC Products

Standard Commercial UV Light System
L-brackets or panel mount for easy installation.

Tubular Rack System
Mounts using 1/2" EMT tubing for cost-effective, flexible installations.

APCO[®] Rack System

Our most advanced system. Award-winning APCO[®] technology fights odors and VOCs. Normal or high output lamps (for duct mounting).

Perpendicular

Airborne Duct System

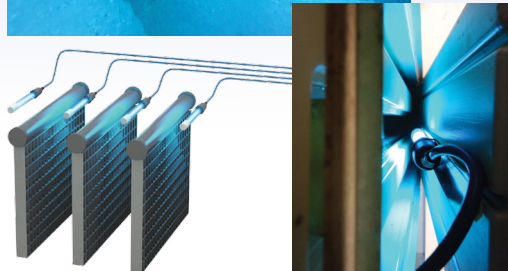

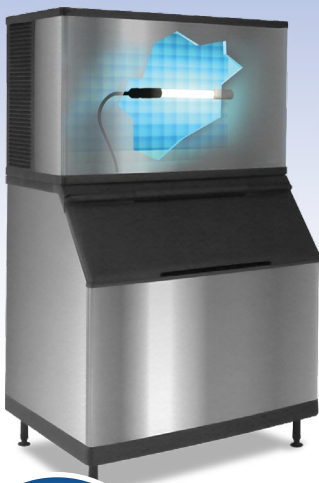

High output lamps for maximum airborne kill. Mounts In-line with, or perpendicular to, the duct with optional APCO modules.

In-line

UV Disinfection for Ice Machines

ICE UV works around the clock, killing germs and saving money on ice machine maintenance. Ice UV is easy to install and fits in nearly all ice makers. Multiple lamps and larger sizes are available.

Other Applications

Fresh-Aire UV[®] offers UV light disinfection products for all types of HVAC systems including furnaces, air handlers, package units, PTACS, Fancoils, & Minisplits
