

# WINNER!

The Fresh-Aire UV team is proud to announce that their AirSMART IAQ System has won GOLD in the coveted 2017 Dealer Design Awards sponsored by The ACHR NEWS.

The 2017 Dealer Design Awards honor a wide variety of contractor-oriented HVACR products with features that assist in installation, maintenance, and service. These products showcase the best that HVAC has to offer. Entries are judged by 20 contractors from across the U.S. who have years of real-world experience and have their fingers on the pulse of the industry. In this year's contest, judges were able to look at products that strive to be smarter, more accessible, and offer greater user control. Those proud few who were honored in this year's competition have been rewarded for their design excellence and the investment in research and development that went into the creation of their products.
