RE: Use of the Fresh-Aire UV induct air purifier at IP Casino Resort Spa in Biloxi, MS

Hello, Leon,

After installing the Fresh-Aire UV induct air purifier product in all 205 smoking hotel rooms on five floors at IP Casino Resort Spa here in Biloxi, MS about ten months ago, we continue to experience great air quality improvement and reduced maintenance in these rooms.

The air quality in all smoking rooms is noticeably improved and the odors from tobacco smoke are virtually a thing of the past. The cost of the Fresh-Aire UV induct air purifier is reasonable and enhanced by the reduction in labor costs with regard to housekeeping and maintenance.

Our department would recommend the Fresh-Aire UV induct air purifier to any commercial, hospitality or restaurant business venues wanting to keep their operations odor-free with enhanced air Quality.

IP Casino Resort Spa in Biloxi, MS will be making use of the Fresh Aire UV induct air purifier system for many years to come.

With best regards,

Tommy A. Jones, Lead Engineer, Facilities
