JULY 10, 2012

DEAR RON,

IN THE SUMMER OF 2008, I WAS CONTACTED BY JAMES DULWORTH, PLANT SUPERVISOR OF COOKEVILLE REGIONAL MEDICAL CENTER ABOUT ONE OF THEIR FACILITY'S HAVING A SEVERE ODOR PROBLEM. WE IMMEDIATELY RESPONDED BY RECOMMENDING COMPLETE CLEANING AND SANITIZING OF TWO COMMERCIAL SIZE UNITS THAT SUPPLIED THAT BUILDING.

THIS SEEMED TO SOLVE THE PROBLEM FOR SEVERAL MONTHS. BUT SLOWLY THE ODOR WOULD PERIODICALLY REOCCUR. AT THAT POINT WE CHOSE TO CLEAN JUST THE COILS AND THIS WOULD SUPPLY TEMPORARY RELIEF. FINALLY AFTER MUCH RESEARCH I DISCOVERED THE ONLY WAY TO CONTROL WHAT WAS NOW A DIRTY SOX SYNDROME, WAS THROUGH THE USE OF UV BULB TECHNOLOGY.

AFTER LOOKING AT MANY DIFFERENT PRODUCTS WE FOUND THAT ONLY THE FRESHAIRE, DUAL LAMP COMMERCIAL 32" BULB SYSTEM WAS THE ONLY PRODUCT THAT WOULD HANDLE THE PROBLEM.

ON 2-13-09, COIT INSTALLED 2 -32" COMMERCIAL FRESHAIRE UV DUAL LAMP SYSTEMS IN THE 2 PACKAGE UNITS IN QUESTION AND HAVE NOT HAD A SINGLE PROBLEM WITH ODOR OUT OF EITHER ONE.

BOTH JAMES AND I BOTH JUST WANTED TO LET YOU KNOW WHAT A GREAT PRODUCT YOU OFFER AND ALSO BACK IT WITH A FULL LIFETIME WARRANTY.

SINCERELY
