Dear Fresh-Aire UV

I have been extremely happy with the UV Light that was installed in my business by service technician Matt Steinmetz. He took pictures before and after the UV light was installed which showed proof that the ultraviolet light was actually cleaning and maintaining the air handler. At first we were skeptical, but 30 days after the installation, during an examination, the coil was obviously clean with no visible signs of biological growth. Since then, we have had no service calls concerning the air handler; prior to the install we had chronic problems with the unit.

Thank you for improving the quality of our business with this product.

Sincerely,

Brain Levin
Human Resources Manager
