Dear Leon,

After extensive testing in several of our guest rooms I am more than comfortable in stating that the Fresh-Aire UV Dual Lamp Air Handler systems that we have installed are doing a remarkable job in totally eliminating any and all mold growth in these air handlers. With or without the OS odor sanitizing model lamps all of the mold growth in the air handlers has been eradicated. I have used the OS model lamps in a few rooms to "sweeten" the air a little with a lot of success.

Every now and then I run across a product that performs as advertised and your product is one of them. I can't thank you enough for your helping me to restore our guest rooms to an environmentally sound condition.

Best Regards,

George D. Webb
