

air SMART™

IAQ

The Complete Solution for Indoor Air Quality Management!

- 1 Monitor:
- 2 Control:
- 3 Clean:

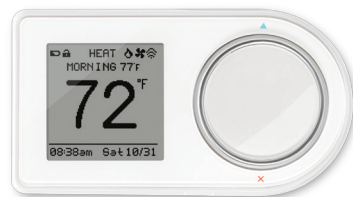

Includes 3 Devices to Monitor Control & Clean Indoor Air

foobot

LUX / GEO®

FRESH-AIRE UV
APCO®

The foobot air quality sensor, placed anywhere in the home, detects various pollutants including VOCs, particulates & CO2.

A rise in air pollutants detected by the sensor, tells the LUX/GEO® thermostat to turn on the HVAC unit to circulation mode.

With the airSMART™ advanced air purification products, contaminants are "neutralized" for cleaner, healthier air.
