

## COMMERCIAL SERIES

# UVGI Trial Installation\*

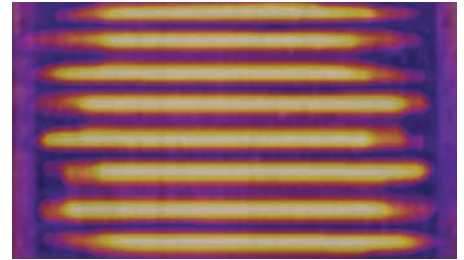

*\*For commercial/industrial applications only*

Building owners and managers can now see the advantages of UVGI disinfection on their own HVAC system at no cost! Fresh-Aire UV®, known world-wide for the quality and innovation of our IAQ products, is offering a free trial installation and site analysis service for hospitals, office buildings, and other similar commercial/industrial HVAC applications to promote the effectiveness and value of our UVGI products.

*The best candidates will be systems with a history of biological growth fouling*

To start the process Building owners simply provide basic information about their HVAC system. Facilities that meet our criteria will then receive an on-site analysis. The best candidates will be systems with a history of biological growth fouling that have required frequent cleaning. This offer is limited to facilities in the continental US.

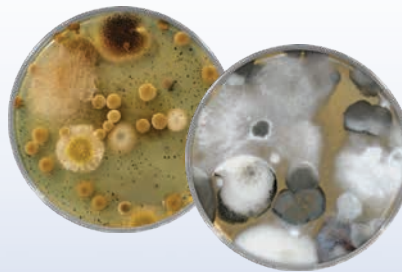

*IR camera reveals effects of bio-fouling*

*Free UVGI Trial Kit*

*A comprehensive analysis is done on-site*

*Samples taken at the site reveal the type and extent of biological contaminants*

This free trial includes a free site analysis of one of the HVAC systems of your choice at your site. Upon completion, a temporary trial installation of a commercial UV light system will be installed for a period of time.

After a period of time sufficient to demonstrate the value of the technology building owners will have the choice to purchase the UV system or we will remove it. We are confident that this trial installation will prove the effectiveness and value of our products.

*Trial UVGI System installed at no cost to you*
