

# Airborne Duct System

Maximize airborne kill of dangerous pathogens such as viruses, bacteria, and mold spores with the Fresh-Aire UV<sup>®</sup> Commercial Series Airborne Duct System (ADS). This duct-mounted HVAC UVGI system is designed for intensive airstream UV-C irradiation. The system features from 2 to 6 Fresh-Aire UV<sup>®</sup> high-output germicidal UV lamps which sterilize airborne biological contaminants as they pass by. The ADS system is fully customizable and can be configured to fit a wide variety of installation parameters.

This system is not recommended for surface disinfection of any materials that are not UV light resistant. Instead, use our Tubular Rack System or Modular Rack System with Fresh-Aire UV<sup>®</sup> normal-output germicidal UV lamps.
